DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 23, 2006 has been entered.

Response to Arguments

2. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Election/Restrictions

1. Claims 14, 15, 25, 26, 36 through 41, and 45 through 54 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to non-elected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on July 31, 2003.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 through 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. More particularly, upon reconsideration, it is not clear at all whether the limitation "a channel formed by the blower and the surface" as recited in lines 9-10 of base claim 1 is or is not intended to refer back to the same element(s) as the same limitation as recited in lines 7-8 of the claim. If these limitations are intended to refer to the same element(s), then recommend replacing the second occurrence of the

Art Unit: 3753

limitation with "said channel formed by the blower and the surface". If these limitations are not intended to refer to the same element(s), then the two limitations should be more clearly differentiated from one another to avoid confusion.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 through 13, 16 through 24, 27 through 35, and 42 through 44 are rejected under 35 U.S.C. 102^(b) as being anticipated by Kitajo.

Kitajo discloses a miniaturized cooling fan type heat sink system and corresponding method for cooling electronic components essentially as claimed, including, for example: a surface or circuit board or substrate 16 to which one or more electronic components 18 are coupled, where the electronic components may include a heat sink 20 mounted thereto; a blower or fan 2 directly mounted to the surface or circuit board 16, with the blower or fan 2 having two ports, and cover plate 4 being readable on the shroud. See Figures 1 through 3. Also see column 5, lines 29-34.

The reference thus reads on the claims.

Conclusion

3. The additional prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
